Buildings do not come with roofs-recommended you go to hobby supply store and buy 1/4" foam board and cut to fit your building.					
Kits come with Grant Line Windows and doors. Four sided buildings include AC and roof vents.					
Double T Buildings are modular, and you can build them as intended kit, or kitbash into your own freelance design.					
Modules are 2 1/4" wide. Short are 5" tall, Tall are 8" tall, Adapter Walls are 3 1/8" tall					
Make Checks to John C. Smith. Shipping \$12 per kit USPS Domestic
